## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a process for producing isoprene. Applicants admit that a method of producing isoprene comprising continuously or intermittently supplying isobutylene and/or t-butanol, formaldehyde and water into an acidic aqueous solution, and reacting the reaction mixture while distilling away a mixture comprising produced isoprene, water, unreacted starting materials and other low boiling point components from this reaction mixture to the outside of the reaction system is known (see page 1, 2<sup>nd</sup> paragraph and U.S. Patent 4,511,751 supplied by the applicants). However, what is novel and unobvious is the claimed process wherein the reaction is carried out while controlling the concentration of high boiling point byproducts, which is produced and accumulated in said reaction mixture, within the range of 0.5-40 mass%. No prior art alone or in combination was found to disclose or suggest the claimed control step. Furthermore, there is a showing in the specification (Table 1, page 28) of superior results when the concentration of high boiling point byproducts is kept within the claimed range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to In Suk Bullock whose telephone number is 571-272-5954. The examiner can normally be reached on Monday - Friday 6:00-2:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
